

How People Learn: Brain, Mind, Experience, and School.

This exciting volume from the National Research Council is the product of a two-year project evaluating new developments in the science of learning. It was edited by noted researchers, John D. Bransford, Ann L. Brown and Rodney R. Cocking. It joins the best of cognitive science with the field of education.

How People Learn: Minda, Brain, Experience, and School

Bransford, John D., Brown, Ann L., and Cocking, Rodney R. (Eds)

National Academy Press, Washington DC
